Compact: Evaluation(s)

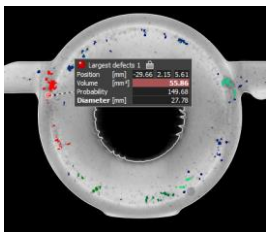

- Contains **ROIs, Coordinate Measurements, and Analyses**
- In a very compact format to export and import analysis settings
- Use **Preview** to see what's inside

Mov(i)e it or lose it: Visuals

- Take snapshots of windows using **Copy to clipboard**
- Use **Picture in picture** and adapt the resolution in the **Save Image(s)** dialog
- Scroll through your data set with **Save movie/image stack**

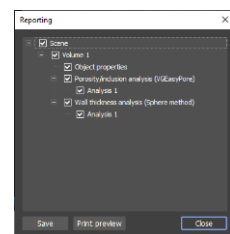

Stop right there: Annotations

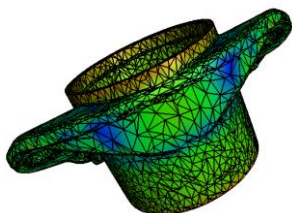

- Create automatic annotations using **Rules**
- Highlight annotations to jump in the 2D windows for images
- Stop at highlighted annotations as points of interest in the movie

Not just hard numbers: Reports

- Uncheck columns you don't need and click **Hide all**
- Create automated **Images** using **Rules**
- Combine reports with **Top-level reporting**
- Selections in the individual reports tab of analyses are taken for **Top-level reporting**

All in 3D: Colored meshes from analysis result(s)

- Use **Analysis > Create colored mesh from analysis result(s)**
- Available for nominal/actual comparison, wall thickness analysis, porosity/inclusion analysis
- **Export** to use in external viewers
